Re: WC Docket No. 05-196/Subscriber Notification Report (*filed via ECFS*)

Dear Ms. Dortch:

1. Clear Sky Broadband, Inc. ("CSBB") provides converged network services over a private network (not the public internet) principally to enterprise customers. Interconnected VoIP services are a part of CSBB's hosted services.
2. On August 4, 2005, CSBB e-mailed a letter to each of its customers of record that use VoIP services advising each such customer that E911 service is not currently available under CSBB's VoIP service. If a customer of record has more than one business location (e.g., a headquarters plus one or more branches), a separate letter was sent on August 4, 2005 via U.S. mail to each branch location advising each such location that the enclosed adhesive labels should be placed on each of their IP phones. A similar letter was sent on August 4, 2005 via U.S. mail to each headquarters location. Each label indicates that E911 service is not available through that phone.
3. On August 9, 2005, CSBB filed a report with the FCC via ECFS, in accordance with the Bureau's *July 26, 2005 Public Notice*.
4. The subscriber notification letter referenced in paragraph 2 above was sent to 100% of CSBB's VoIP customers of record. As of the date of this report, 100% of such customers have submitted an affirmative acknowledgement that they received and understand the letter.

Sincerely,

Dennis James, Chief Operating Officer
